LITEBALLY LED INTO CAPTIVITY .- The learned author of the "Descent of Man," in noticing that the animals often suffer from the diseases that affi or ourselves, might have added that in some cases they are not free from our vices also. According to a receat letter from Darfur, in Africa, the monkeye of that region are inordinately fond of a kind of beer made by the patives, who use it to capture their simial poor relations. Having plac d quantities of the beer where the minkeys can get at it, the natives wait until their victims are in various degrees of inebriation, and when they mingle with them the poor creatures are too much fuddled to recognize the diff reaces between negro and ape. When the negro takes the hand of one of them to lead h m off some other fond creater clings to the hand of the latter one. another to his hand, and thus a single negro may sometimes be seen carrying off a string of staggering monkeys When secured the beer is administered in decreasing quantities, so that they may only gradually awaken to the sad resales of their spree.
